DETAILED ACTION

Allowable Subject Matter

Claims 1-6 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-3, the prior art alone or in combination does not teach the limitation of a multiple-layer diffusion junction capacitor structure comprising: an N-type region and P-type region formed in a semiconductor substrate, wherein an N-type finger and a P-type fingers are inter-digitated and in direct contact.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

The application has argued that Winters is silent with respect to a multiple-layer diffusion junction capacitor structure comprising: an N-type region and P-type region formed in a semiconductor substrate, wherein an N-type finger and a P-type fingers are inter-digitated and in direct contact. The examiner finds this argument persuasive. Therefore, the examiner made decision to allow this limitation over the prior art of record.
